Xavier KNOEPFFLER-POUT

19/12/2003
With an interest in Technology
IOT and beyond!

About me:

I am a student of 2 years within the N&T sector of the "IUT de Nord Franche-Comté" Situated in France.
I have also obtained a
Baccalauréat in laboratory sciences and technologies in 2021

My Interests:

-Computers, be they old or new

-Learning new languages as a way broaden my communication capabilities

-Coding be it games or different IOT devices with the help of Arduino.
Being mostly knowledgeable in HTML, C#, C++ and Javascript.
I am always open to learn more

-Creating virtual servers with GNS3, however, I have already handled real devices beforehand

Contacts:

To contact me on my E-mail, I can be reached at:

X.KnoepfflerPout_2003@outlook.fr

To contact me on phone, my number is:

+33 07 83 80 98 91

My address is:
16 Rue de Valdoie, Sermamagny (France)

Sneeunwgans 13 Nieuwegein, 3435DK (Netherlands)

My experiences:

Work Experiences in Rabobank

In 2018 and 2019, I have chosen to my work experience in Rabobank as such sector was quite interesting to me.
I discovered the ins and out of managing a database and I got to see how work in an office setting got done.
After said work experience, I have always been interested in learning a little more!

Project Management

In 2023-2024, I have decided to take a course which was all about Project Management, not only did I learn about the different ways of managing any and all types of projects,
but I also learned the inner workings of different types, such as SCRUM, Agile and Kanban
Therefore being ready to implement them or take part in them.

Crisis Management

Within the plans set by my IUT, we had to experience a "Crisis" during said, task, we were graded based on how we handled the situation, we it with the e-mails we sent and received, the different statements our company had made and the way we stayed calm during this simulated cyber-attack upon our company.
In the end, our group was ranked as the best one in terms of communication as a team.

Universities:

IUT de Nord Franche-Comté
Networking & Telecommunication
(2022-2024)

During the years in which I have been a student, I have learned and mastered many things, be it:
-The usage of a Linux operating system

-The ways to set up various IP protocoles, be it under IPv4 or IPv6 (OSPF, BGP, UDP, TRUNK…)

-A couple of techniques in Cyber Security, be it how to defend a network and understand why certain procedures are important.

-An ability to code certain programs useful in an IOT sector, be it a device which can tell the temperature in a room down to a controller which can be used for computer games.
